1DAY

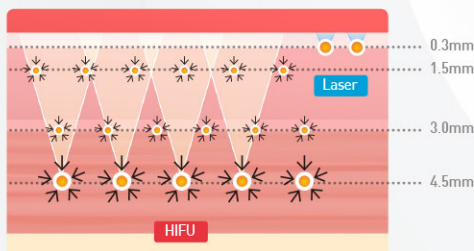

Just one day, OK!

It is possible to return to daily life right after treatment, and you can get immediate satisfaction through one treatment!

SAFETY

Safe HIFU without surface damage

The HIFU technology of doublo has been proved by 1000 installed systems and it is quite different from laser technology because of no damage on surface and satisfactory rejuvenation effect.

Build the feminine internal beauty with women's only HIFU

Ultra Vera™ gives secret tightening effect by delivering High Intensity Focused Ultrasound (HIFU) to Lamina propria and Fibromuscular wall.

Non-invasive, no pain, no bleeding

It just takes 20mins for treatment, and it is possible to return to daily life immediately.

No influence on childbirth

Ultra Vera™ treatment has no influence on natural childbirth, and it is also suitable for single women.

Additional effects

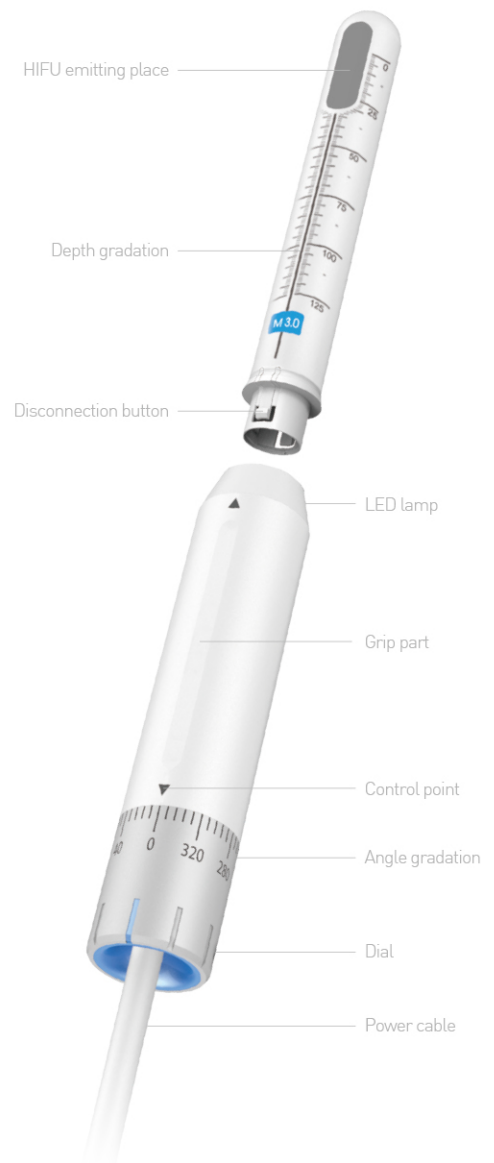

Besides tightening effects, it is also helpful for women who have urinary incontinence symptom.

Reliable technology of Hironic's HIFU series

The HIFU technology is proved by over 200,000 treatments cases of Hironic products.
